

Swiss Post Cargo

Swiss-Express Innight Industry & Agriculture

Do you rely on delivery of your goods by the morning before work starts? Swiss-Express "Innight" provides you with tailored overnight logistics. We collect your goods in Switzerland and abroad at the agreed time in the late afternoon or evening and deliver them to the agreed location. We ensure that your goods are right where your customer needs them.

Following-night delivery

We collect your goods in Switzerland and abroad, or you deliver them to our logistics centers. Delivery is made throughout Switzerland and the Principality of Liechtenstein by the start of working hours on the next day or as agreed. We take care of all customs clearance for you.

Returns

On request, we will also take returns or empty containers with us on delivery. With the Swiss-Express "Innight" App, returns are recorded simply and conveniently.

Carbon-offset delivery with "pro clima"

Good for the climate, good for your image: "Innight" consignments are carbon offset.

Delivery point and key management

Delivery is made to an agreed delivery point. This can be a ramp, a letterbox, a technician's vehicle or a shop. To ensure access, we manage around 8,000 anonymized keys and badges. You can manage delivery points online.

Consignments of dangerous goods

Consignments of dangerous goods up to 1,000 ADR points can be sent via the Innight channel.

Consignment data

You send us your consignment data electronically via Swiss-Express Web or EDI interface by 9 p.m. You can also track your consignments here. High quality and reliability are our top priority, which we document with daily reports on issues such as delivery quality.

All parcels are scanned when they are accepted, when they arrive in the logistics center, when they are loaded, upon delivery, as well as upon return delivery. The delivery point is also recorded. This way you know where your consignments are at all times.

You can send the following with Swiss Express "Innight"

- Permitted dangerous goods up to 1,000 ADR points
- Goods that can be handled by a driver with a sack or pallet truck
- Goods with a maximum length of 250 cm and a maximum girth (longest side and circumference) of 400 cm.
- Goods with a maximum weight of 250 kg per transport unit and a maximum of 400 kg per consignment
- Goods that are packaged securely for transportation and the nature of which does not constitute a threat to the environment or to the health and safety of Swiss Post's employees

Innight Agriculture

We collect your agricultural goods or equipment from your warehouse. If the warehouse is located abroad, we will handle the export and import customs clearance.

In our logistics center, we triage the individual parts by hand and combine them for the respective recipients.

Delivery throughout Switzerland and the Principality of Liechtenstein takes place at night. This ensures that the required parts are available at the start of work.

Innight Agriculture ensures that exactly the goods you need arrive on site quickly and conveniently. This saves valuable time for repairs. Your customers need less extensive storage space

Swiss Post Cargo is an established and experienced provider of overnight logistics for the agricultural sector. We serve a large number of farms in Switzerland and already have access to secured parking spaces.

The benefits for you

- Handling and triage are done manually to prevent damage
- We take care of all customs clearance for you
- Delivery times can also be agreed individually
- Transport with lift gate trucks, if necessary
- Your customers need less storage space
- Delivery throughout Switzerland and the Principality of Liechtenstein
- Carbon-offset delivery for all of your consignments with "pro clima" – good for the climate, good for your image.
